Address: Rochester, NY, 14623

## SUMMARY

Software Engineer with 3+ years of experience in Java Spring Boot, specializing in scalable microservices, RESTful APIs, and cloud-based solutions. Proven track record of delivering secure, high-performance backend systems, including leading enterprise level applications and optimizing data migration processes. **Seeking full-time opportunities starting January 2025.**

## EDUCATION

- **Masters of Science in Computer Science** Rochester, NY  
*Rochester Institute of Technology; GPA: 3.94*  
*Courses: Foundation of Algorithms, Artificial Intelligence, Big Data Analytics, Database System Implementation*  
Aug, 2022 - Dec 2024
- **Bachelor of Engineering in Information Technology** Pune, India  
*Maharashtra Institute of Technology; GPA: 3.96 (8.98/10.0)*  
*Courses: Data structures, Distributed Systems, Machine Learning, Cloud Computing, Software Architecture and Design*  
Aug, 2016 - May, 2019

## FEATURED SKILLS

- **Programming Languages:** Python, Java, JavaScript(ES5/ES6), Typescript, C#, C++, Go
- **Framework and Libraries:** Spring Boot, .Net Core, Node.js, Flask, FastAPI, ReactJS, Pandas, PySpark, Mockito, JUnit
- **Databases:** Spring JPA, MySQL, Oracle, MongoDB, PostgreSQL, Firebase, Snowflake, Redis
- **Additional Technologies:** Azure, AWS, Docker, Kubernetes, Apache Tomcat, Apache Kafka, Swagger, Jenkins, Git
- **Skills:** Back-end, Front-end, Full-Stack, Micro-services, CI/CD, Agile, SCRUM, Unit Testing

## EXPERIENCE

- **Graduate Teaching Assistant, Rochester Institute of Technology** Aug, 2023 - Dec, 2023; Aug, 2024 - Present  
Tech Stack: **Java, Python**
  - Mentored **150+** students in CSCI 141 (Python) and CSCI 242 (Java), emphasizing data structures, design principles, and object-oriented programming to enhance problem-solving skills and software development foundations.
- **Software Engineering Co-op, Ecolab** Jan, 2024 - Aug, 2024  
Tech Stack: **.NET Core, Azure, Python, Flask, PySpark, Snowflake, Snowpark, SnowflakeML, Streamlit, Git, C#**
  - Engineered a high-performance, multithreaded bulk migration solution, transferring **600k+ images monthly** from Salesforce to Azure Blob Storage while orchestrating metadata updates in Snowflake, significantly enhancing scalability and system efficiency.
  - Automated migration process using C#, leveraging Azure WebApps and WebJobs for cost-effective, and hands-free scheduling.
  - Established data validation using Great Expectations (GX) Testing Suite, ensuring data integrity and quality.
  - Designed and developed a recommendation engine using Snowflake, and Python, generating 800,000 new sales opportunities, **revealing \$10M in potential missed sales opportunities** (with 80% accuracy), helping drive business value.
  - Built a Streamlit dashboard to showcase sales recommendations, providing annual sales estimates for each recommendation.
- **Intern, eQ Technologic** Jul, 2023 - Aug, 2023  
Tech Stack: **Java, Solumina, Apache ActiveMQ, JBoss EAP, Agile Methodologies, GitLab**
  - Researched and implemented data creation and update strategies within the Solumina system, using Apache ActiveMQ.
  - Played a pivotal role in designing and developing robust APIs to synchronize data between Solumina and TeamCenter Enterprise.
- **Software Engineer, eQ Technologic** Jul, 2019 - Jun, 2022  
Tech Stack: **Java, Spring Framework, Oracle, Apache Tomcat, JBoss EAP, Kendo, Agile Methodologies**
  - Led a team of engineers in the Agile development of an enterprise application, collaborating with cross-functional teams on multiple initiatives, and ensuring adherence to the Software Development Life Cycle (SDLC) best practices.
  - Innovated user-friendly applications using eQ's Web App Toolkit and Siemens' Teamcenter APIs, reducing user efforts by over **90%** and significantly improving work efficiency.
  - Engineered scalable data caching utility, enabling real-time report generation by federating data from various sources.
  - Architected and deployed a microservices-based architecture and **built 15+ RESTful APIs**, enhancing system scalability by 30% and improving integration efficiency.

## ACADEMIC PROJECTS

- **MediBook - Hospital Management Microservices-based System:** Github Link Sept, 2024 - Oct, 2024
  - Developed a scalable backend for MediBook with Java Spring Boot, MongoDB, for secure doctor-patient interactions.
  - Implemented OAuth2, JWT authentication, and role-based access control, improving user security.
  - Optimized search, pagination, and sorting using MongoDB for efficient doctor and appointment management.
- **Doodle With AI:** Github Link Feb, 2023 - Mar, 2023
  - Integrated the ML5.js library with ReactJS to incorporate the SketchRNN model, facilitating AI-driven doodle completion and boosting user satisfaction.
  - Built user interface using **ReactJS**, leveraging component-based architecture for efficient rendering and state management.
- **Task Manager API using Go and Gin Framework:** Github Link Oct, 2024 - Oct, 2024
  - Developed a Task Manager API in Go using the Gin framework, implementing CRUD operations for task management.
